About the Conference

The 13th Biennial Conference of the Kogwis (Knowledge Organization for Information Systems) will be held in Bremen, Germany, from September 26-30, 2024. The conference will bring together researchers, practitioners, and students from around the world to discuss the latest advances in knowledge organization.

The conference theme is "Knowledge Organization in the Digital Age." This theme reflects the increasing importance of knowledge organization in the digital age, where vast amounts of information are available online. Knowledge organization helps us to make sense of this information and find the resources that we need.

The conference will feature a variety of keynote speakers, paper presentations, and workshops. The keynote speakers will include leading experts in knowledge organization from around the world. The paper presentations will cover a wide range of topics, including:

* Knowledge representation * Information retrieval * Data mining * Semantic web * Digital libraries * Museum informatics * Cultural heritage

The workshops will provide participants with an opportunity to learn about new techniques and tools for knowledge organization.
