This book provides a comprehensive overview of the intellectual history of urban planning and design since 1880. It explores the key ideas, theories, and practices that have shaped the development of cities around the world.

The book is divided into three parts. The first part examines the origins of urban planning and design in the 19th century. It discusses the influence of the Industrial Revolution, the rise of cities, and the development of new ideas about how to plan and design cities.

The second part of the book focuses on the development of urban planning and design in the 20th century. It discusses the rise of modernism, the impact of the automobile, and the development of new planning and design techniques.

The third part of the book examines the challenges facing urban planning and design in the 21st century. It discusses the issues of sustainability, climate change, and social inequality that are shaping the future of cities.

This book is an essential resource for anyone interested in the history of urban planning and design. It provides a comprehensive overview of the key ideas, theories, and practices that have shaped the development of cities around the world.
