

# How Much Is That Cure In The Window? An Honest Look at the High Cost of Healthcare

The United States spends more on healthcare than any other country in the world. In 2020, the United States spent \$4.1 trillion on healthcare, which is more than 18% of the country's gross domestic product (GDP).

Despite spending so much on healthcare, the United States has some of the worst health outcomes among developed countries. For example, the United States has a higher infant mortality rate and a lower life expectancy than many other developed countries.
