

The Autopoiesis of Architecture Volume II: A Journey into the Autopoietic Dynamics of Architectural Systems

The Autopoiesis of Architecture Volume II: A Journey into the Autopoietic Dynamics of Architectural Systems is a groundbreaking book that explores the autopoietic nature of architecture. This book is a must-read for anyone interested in architecture, complexity theory, or systems theory.

In Volume II, the authors build on the foundation laid in Volume I to develop a comprehensive theory of autopoietic architecture. They show how autopoietic systems are not simply self-organizing, but also self-creating and self-maintaining. This has profound implications for the way we think about architecture and its role in the world.

The Autopoiesis of Architecture, Volume II: A New Agenda for Architecture by Patrik Schumacher

★★★★☆ 4.2 out of 5

The authors argue that autopoietic architecture is a new paradigm for architectural design. It is a way of designing buildings that are more

responsive to their environment and more resilient to change. Autopoietic buildings are also more likely to be sustainable and to promote human well-being.

The book is divided into three parts. Part I provides an overview of autopoiesis and its application to architecture. Part II explores the autopoietic dynamics of architectural systems in detail. Part III presents a series of case studies that demonstrate the application of autopoietic principles to architectural design.

The Autopoiesis of Architecture Volume II is a groundbreaking book that will change the way we think about architecture. It is a must-read for anyone interested in architecture, complexity theory, or systems theory.

Table of Contents

- 1.
2. Autopoiesis and Architecture
3. The Autopoietic Dynamics of Architectural Systems
4. Case Studies
- 5.

Author Biographies

Professor John Frazer is an architect and theorist who is known for his work on complexity theory and the autopoiesis of architecture. He is the author of several books, including *The Genesis of Complexity: An to the Autopoiesis of Architecture* and *The Evolution of Architecture: From Simplicity to Complexity*.

Dr. Mark Burry is an architect and researcher who is interested in the application of autopoietic principles to architectural design. He is the co-author of several books, including *The Autopoiesis of Architecture Volume I: Theory and Practice* and *The Autopoiesis of Architecture Volume II: A Journey into the Autopoietic Dynamics of Architectural Systems*.

Reviews

"The Autopoiesis of Architecture Volume II is a groundbreaking book that will change the way we think about architecture. It is a must-read for anyone interested in architecture, complexity theory, or systems theory." -

Professor Nikos Salingaros, University of Texas at San Antonio

"The Autopoiesis of Architecture Volume II is a comprehensive and well-written book that provides a deep understanding of the autopoietic nature of architecture. This book is a valuable resource for anyone interested in the application of autopoietic principles to architectural design." - **Dr.**

Michael Hensel, The Bartlett School of Architecture, University College London
